www.unh.edu/survey-center

DURHAM, NH – New Hampshire Governor Maggie Hassan's job approval has dropped somewhat, but she remains popular and continues to lead her Republican challenger Walt Havenstein.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Six hundred and eighty-one (681) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between September 29 and October 5, 2014. The margin of sampling error for the survey is +/- 3.8 percent. The sample included 532 likely voters (with a +/- 4.2 percent margin of sampling error).

Interest in 2014 Election

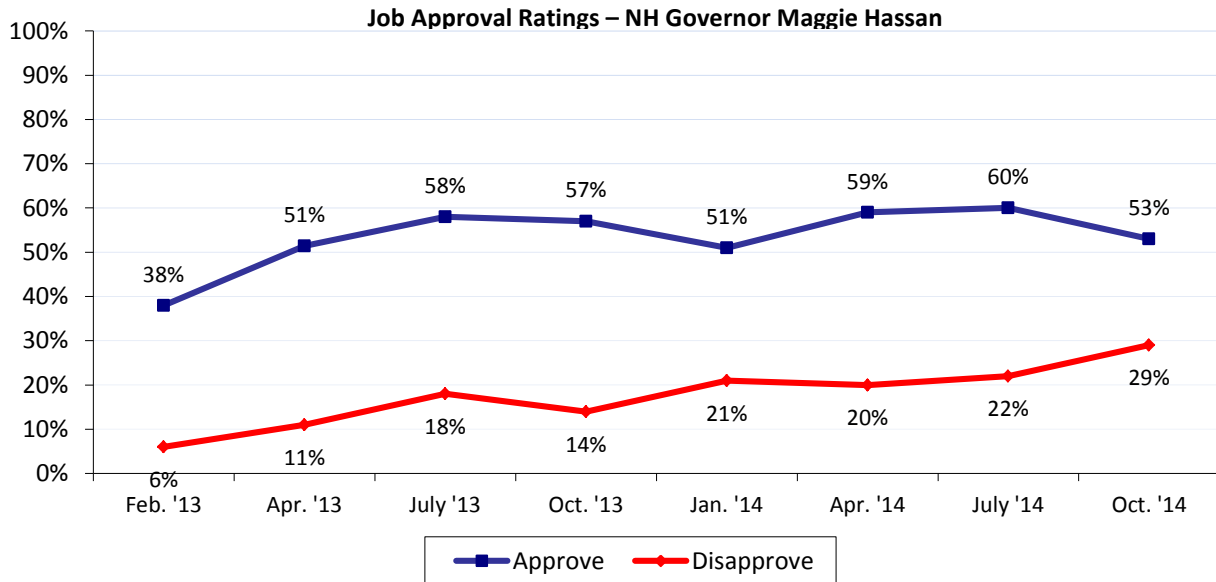

With the 2014 general election just a month away, only three in five Granite Staters (61%) consider themselves extremely interested (28%) or very interested (33%) in the 2014 general election. Republicans (71% are extremely or very interested) have a slight edge on Democrats (63%) when it comes to enthusiasm, while just 45% of Independents are interested in the upcoming election.

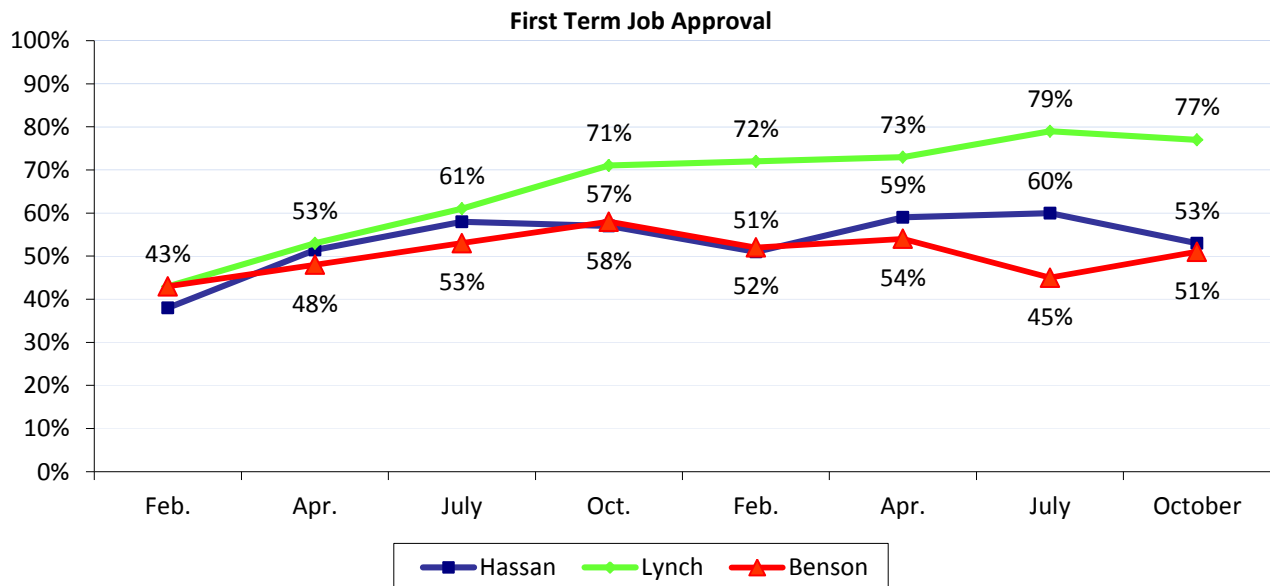

* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Gubernatorial Approval

Democratic Governor Maggie Hassan continues to have the approval of a majority of New Hampshire residents. In the most recent Granite State Poll, 53% of New Hampshire adults say they approve of the job Hassan is doing as governor, 29% disapprove, and 18% are neutral or don't know enough to say. Hassan's job approval rating has dropped somewhat since July. Democrats (87% approve, 6% disapprove) and Independents (42% approve, 24% disapprove) approve of Hassan's job performance, while Republicans (23% approve, 56% disapprove) disapprove. Among 2014 likely voters, 56% approve of Hassan and 30% disapprove.

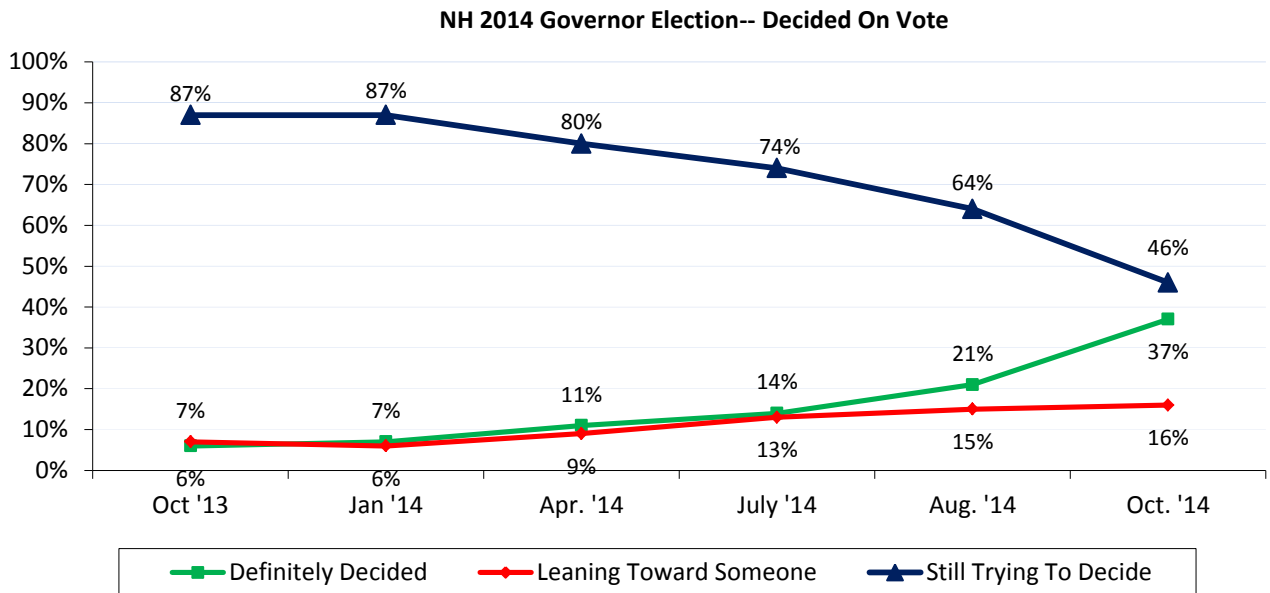

Hassan's job approval ratings at this point in her term are similar to Craig Benson, whose approval rating was 51% in October 2004. John Lynch enjoyed very high job approval ratings at this point in his first term, and he was elected by a wide margin in 2006 while Benson narrowly lost to Lynch in 2004.

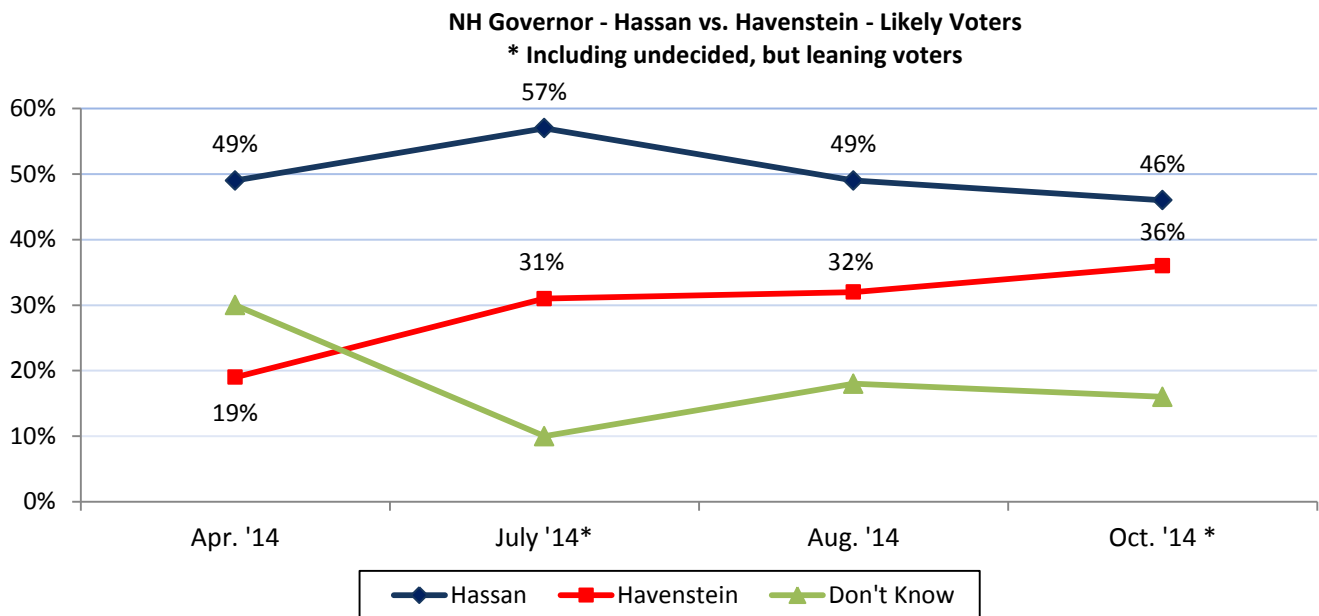

2014 NH Gubernatorial Election

Despite the election being weeks away, many New Hampshire voters are still undecided about who they will eventually vote for in the 2014 gubernatorial election -- 37% say they have definitely decided on who they will support, 16% are leaning toward a candidate, and 46% are still trying to decide.

Gubernatorial Trial Heat

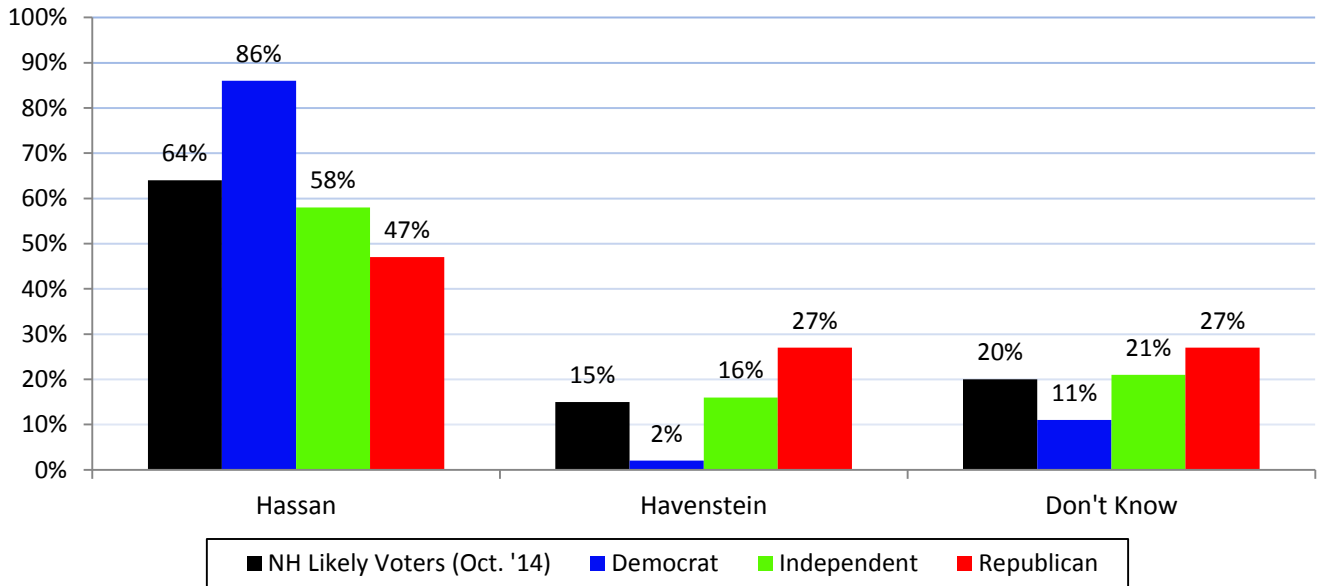

If the 2014 gubernatorial election were held today, 40% of likely voters would vote for Hassan, 30% would vote for Republican nominee Walt Havenstein, 2% would vote for someone else and 28% are undecided. When undecided voters are asked which candidate they lean toward supporting, the race stands at 46% for Hassan, 36% for Havenstein, 2% for some other candidate and 16% remain undecided. Both Havenstein and Hassan hold significant leads among their parties' voters (by 74%-9% and 90%-2% respectively), while Hassan has a slight lead among Independents (34%-26%).

Who Will Win 2014 Gubernatorial Election?

When asked which candidate they think will win the 2014 gubernatorial election, 64% of likely voters think Hassan will be re-elected, only 15% think Havenstein will win, 1% think someone else will win and 20% are unsure. Nearly all voters who support Hassan (88%) believe she will win, while Havenstein voters are divided with 40% believing that Hassan will win and 34% believing that Havenstein will win. Of those who chose another candidate or are undecided, 52% think Hassan will win while just 8% think Havenstein will win.

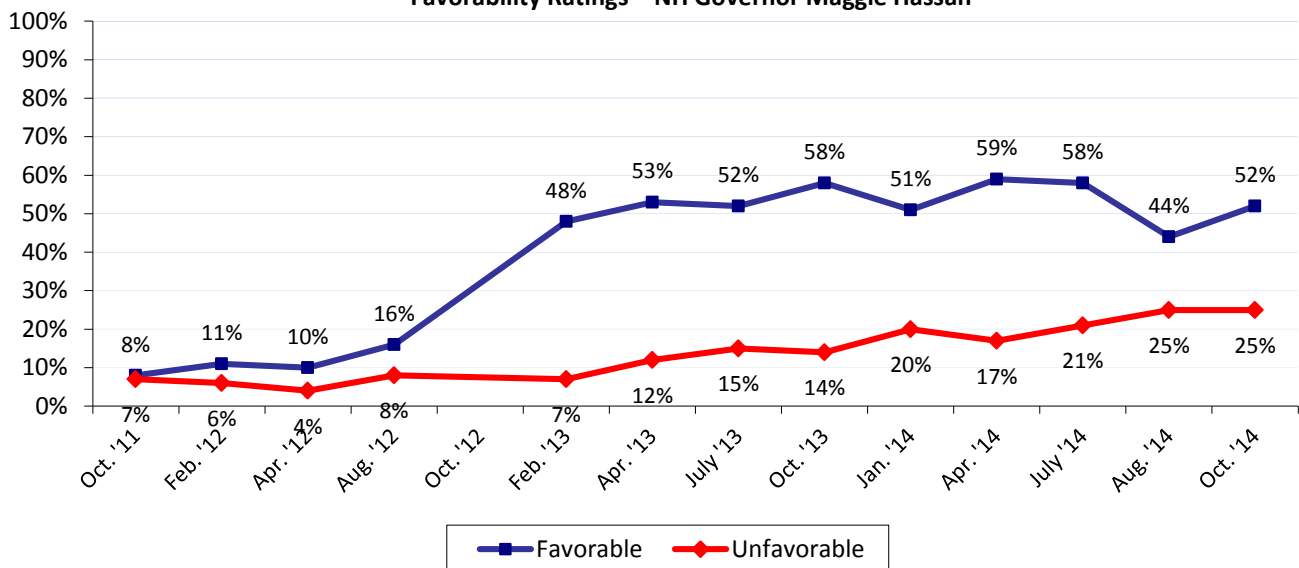

Governor - Who Will Win? - Likely Voters

Favorability Ratings – Governor Maggie Hassan

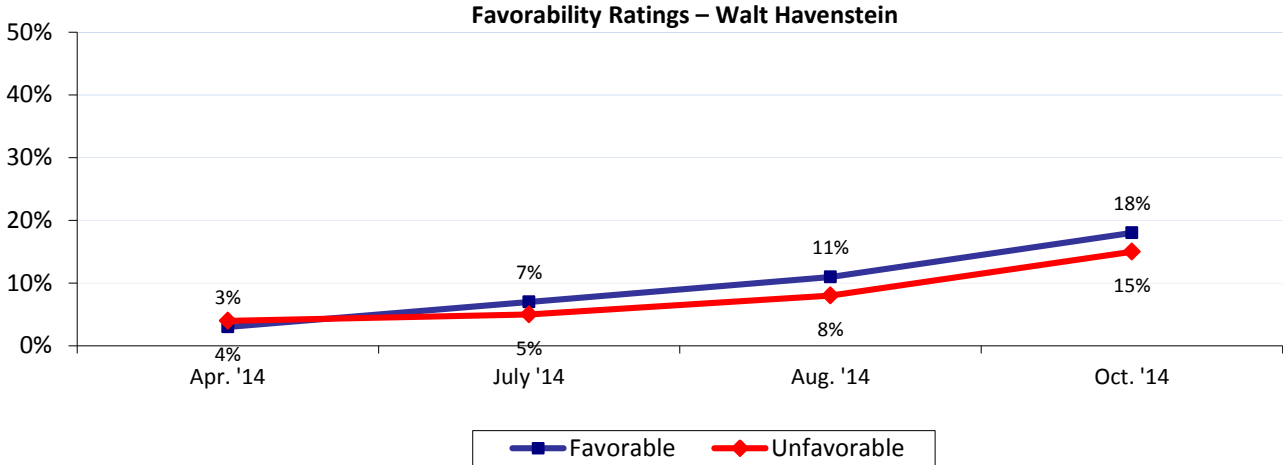

Currently, 52% of New Hampshire adults say they have a favorable opinion of Hassan, 25% have an unfavorable opinion, 9% are neutral, and 14% say they don't know enough about her to say. Hassan's net favorability rating, the percentage having a favorable opinion minus the percentage having an unfavorable opinion, is a +27%, which is up from +19% in August. Hassan is very popular among Democrats (+79% net favorable) and among Independents (+36%), but unpopular among Republicans (-29%). Hassan's net favorability among 2014 likely voters is +28%.

Favorability Ratings – NH Governor Maggie Hassan

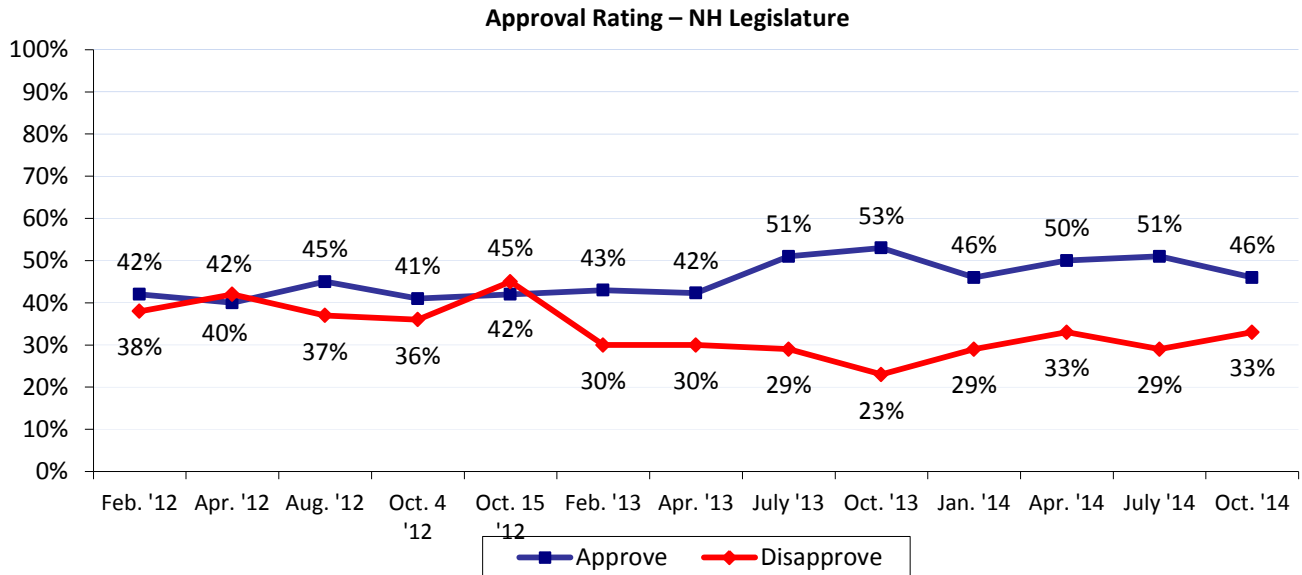

Favorability Ratings – Walt Havenstein

Walt Havenstein is still not well known among New Hampshire residents -- currently 18% of New Hampshire adults have a favorable opinion of Havenstein, 15% have an unfavorable opinion, 7% are neutral and 60% don't know enough to say. His net favorability is +3%, which is the same as it was in August. Havenstein is popular among Republicans (+26%), somewhat popular among Independents (+6%), and unpopular among Democrats (-22%). Havenstein's net favorability among 2014 likely voters is also +3%.

Approval of New Hampshire Legislature

Currently, 46% of New Hampshire adults approve of how the State Legislature is doing its job, 33% disapprove, and 21% are neutral or don't know enough to say. While a majority of Democrats (65%) approve of the state legislature, only 35% of Republicans and 30% of Independents approve of the job it is doing.

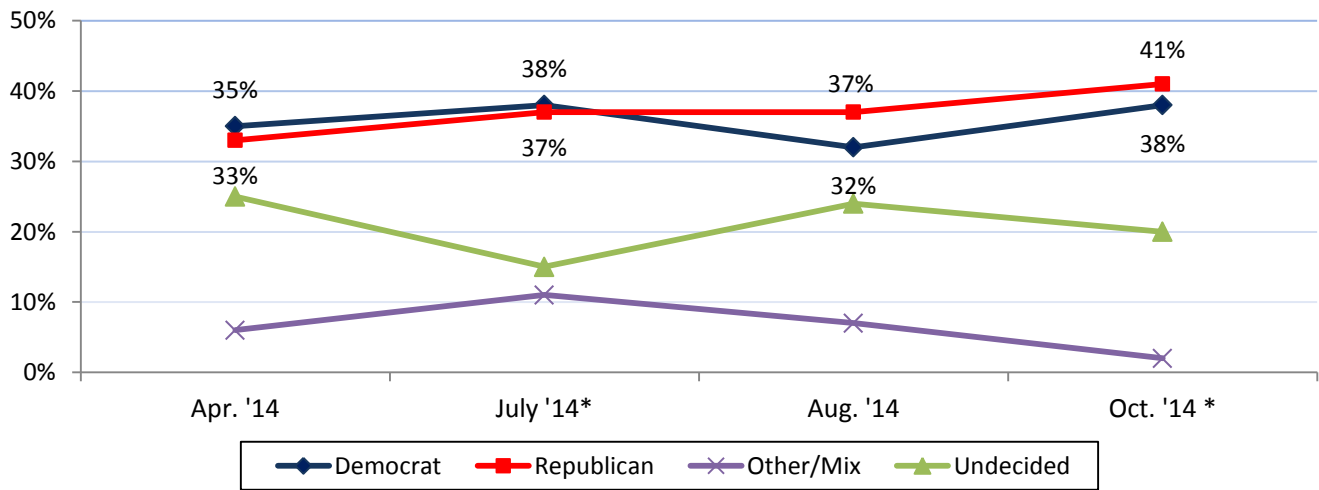

Election for New Hampshire Legislature

Likely 2014 New Hampshire voters were asked which party's candidate they plan to support in the upcoming election for the New Hampshire House of Representatives. Currently, 36% plan on supporting Republican candidates, 36% plan on supporting Democratic candidates, 1% plan on supporting another party or a mix of Republicans and Democrats, and 26% are undecided. When undecided voters are asked which candidate they lean toward supporting, 41% support Republican candidates, 38% support Democratic candidates, 2% support another party or a mix of Republican and Democrats, and 20% are undecided.

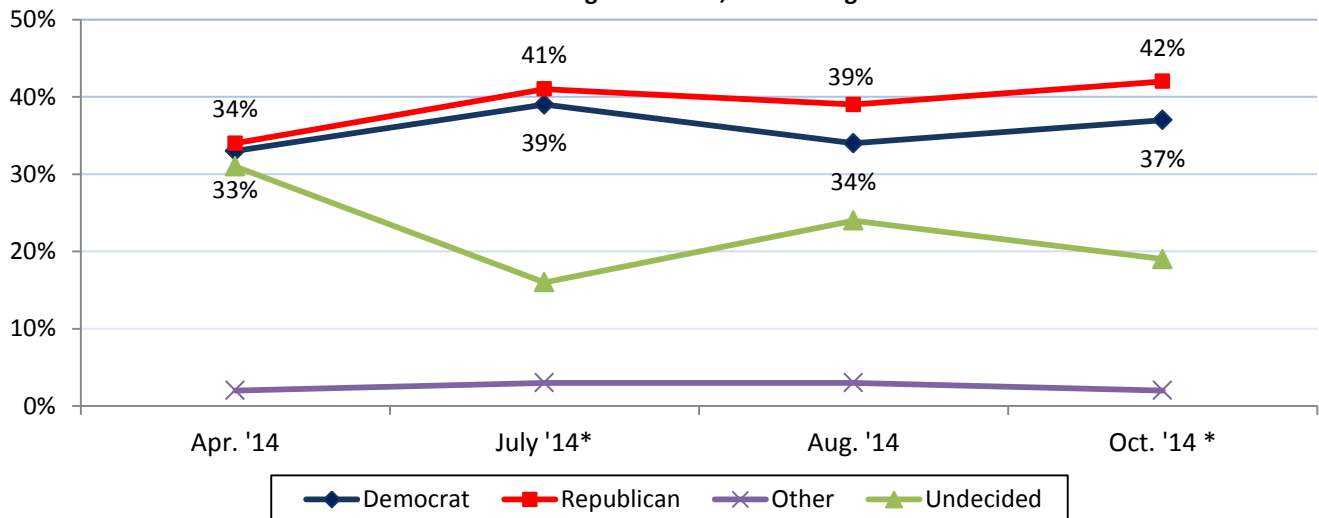

Based on an evaluation of past "generic ballot" polling in New Hampshire and actual election results, these results would translate into 247 seats for Republicans and 153 seats for Democrats. But this estimate, as well as the estimate for New Hampshire Senate seats, is highly dependent on actual turnout in November.

New Hampshire House of Representatives Generic Ballot
* Including undecided, but leaning voters

Likely 2014 New Hampshire voters were also asked which party's candidate they planned on supporting for State Senate -- 41% say they will vote for the Republican candidate in their district, 36% for the Democratic candidate, 2% for another party, and 21% are undecided. When undecided voters are asked which party they lean toward supporting, the Republican share of the vote increases to 42%, 37% say they will vote for the Democratic candidate, 2% would vote for someone else and 19% remain undecided. Based on an evaluation of past "generic ballot" polling in New Hampshire and actual election results, these results would translate into 16 seats for Republicans and 8 seats for Democrats.

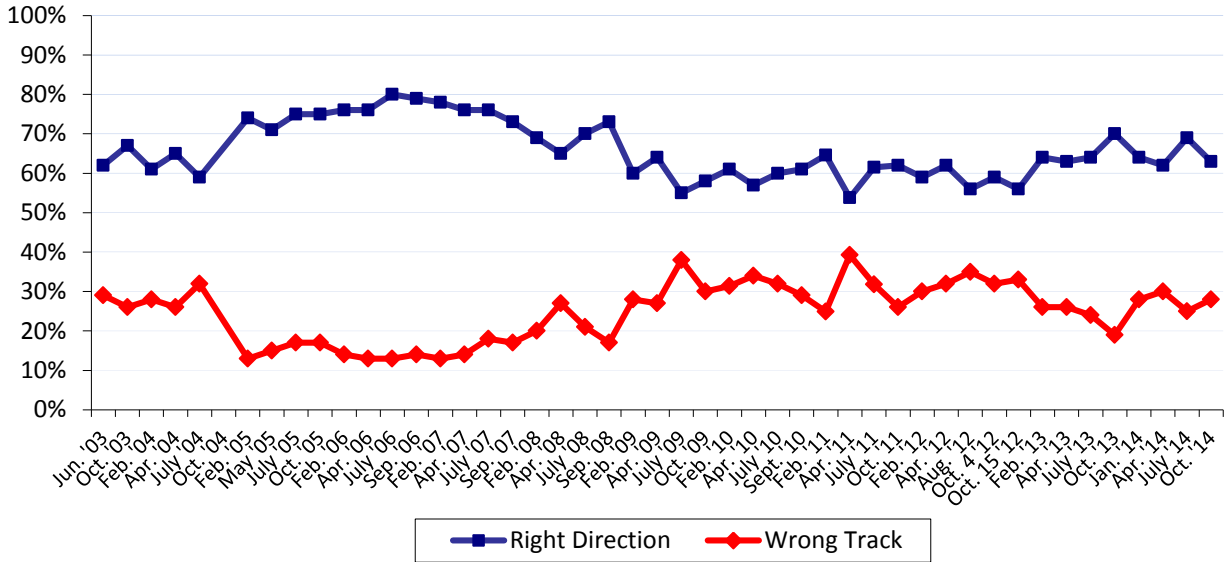

New Hampshire Senate Generic Ballot
* Including undecided, but leaning voters

Right Direction or Wrong Track?

New Hampshire residents continue to believe the state as a whole is headed in the right direction. Currently, 63% of New Hampshire adults feel the state is heading in the right direction, 28% think the state is seriously off on the wrong track, and 9% are unsure. While majorities of Democrats (83%) and Independents (67%) say the state is headed in the right direction, only 39% of Republicans agree.

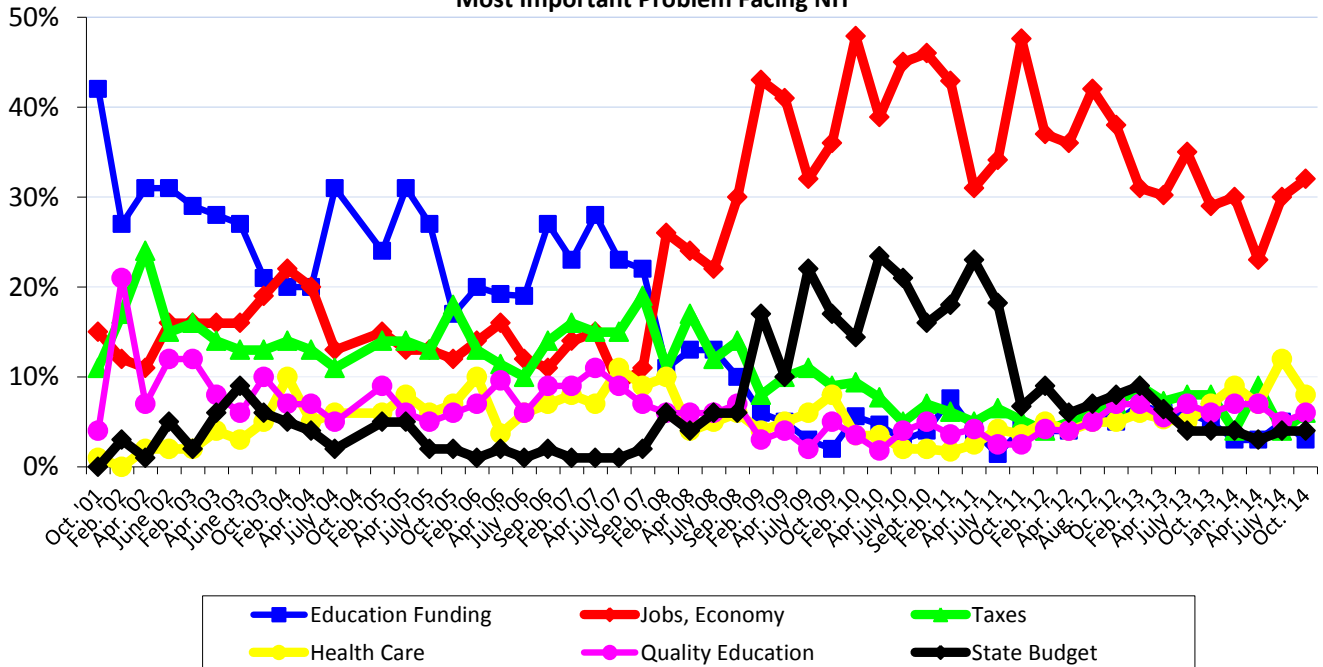

NH Heading in Right Direction or On Wrong Track?

Most Important Problem Facing New Hampshire

The state's economy and unemployment continue to be seen as the most important problem facing the state. Currently, 32% of New Hampshire adults say that jobs and the economy is the most important issue facing the state, followed by health care (8%), education quality (6%), taxes (6%), the state budget (4%) and education funding (3%).

Most Important Problem Facing NH

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Six hundred and eighty-one (681) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between September 29 and October 5, 2014. The margin of sampling error for the survey is +/- 3.8 percent. The sample included 532 likely voters (with a +/- 4.2 percent margin of sampling error).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may sum to just above or below 100%. Respondent numbers in each demographic may not equal the total respondent number due to respondents choosing not to answer some demographic questions.

DK/Undecided	16%	19%
(N=)	(487)	(552)

A historical analysis was done looking at the results of the "generic ballot" question and the actual number of seats won by Republicans in the New Hampshire House and Senate in the 2000 through 2012 elections was presented at the annual meeting of the American Association for Public Opinion Research Annual (AAPOR), and is available from the UNH Survey Center.

The model developed in this paper used for estimating House seats from the generic ballot question is:
 $HOUSE\ SEATS = -264.711 + (2\text{-party}\ GOP\ estimate * 986.291)$

In this Granite State Poll, the two party estimate of House vote percentage with leaners for Republicans, 51.9% (41% GOP / (41% GOP + 38% DEM) = 51.9%) is calculated and inserted into the formula above. This results in an estimate of 247 Republican House seats and 153 Democratic House seats.

The model developed for estimating Senate seats from the generic ballot question is:
 $SENATE\ SEATS = -20.355 + (2\text{-party}\ GOP\ estimate * 68.817)$

In this Granite State Poll, the two party estimate of Senate vote percentage with leaners for Republicans, 53.2% (42% GOP / (42% GOP + 37% DEM) = 53.2%) is calculated and inserted into the formula above. This results in an estimate of 16 Republican Senate seats and 8 Democratic Senate seats.
