THE WMUR GRANITE STATE POLL

October 20, 2016

HASSAN LEADS AYOTTE IN NH SENATE RACE

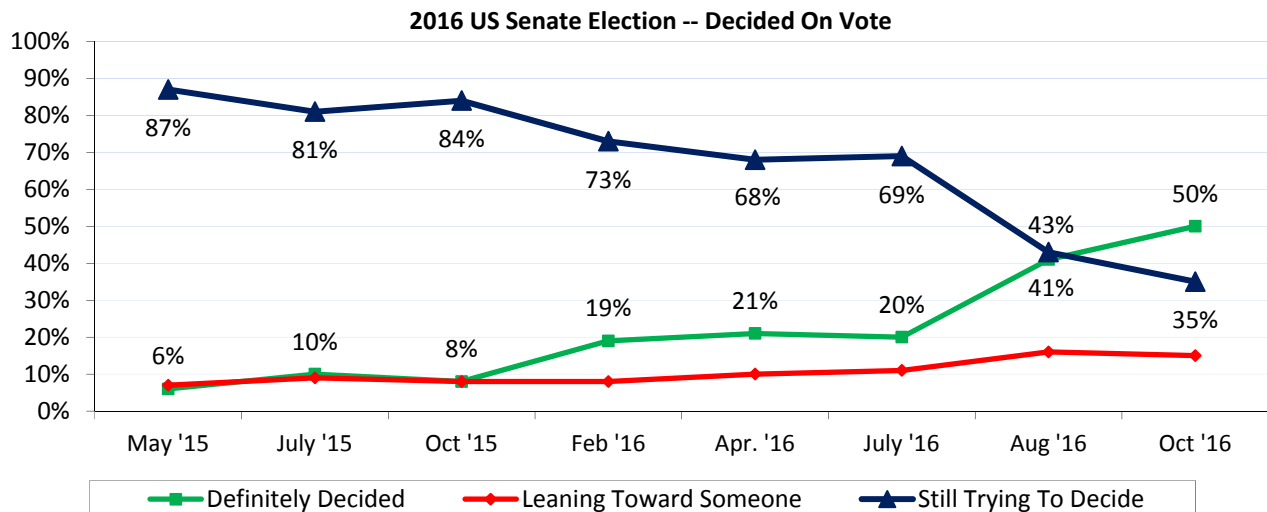

By: Andrew E. Smith, Ph.D.
Zachary S. Azem, M.A.
UNH Survey Center
603/862-2226
www.unh.edu/survey-center

DURHAM, NH – Governor Maggie Hassan has opened a slim lead over Incumbent Senator Kelly Ayotte. Ayotte’s favorability ratings have declined in recent months while Hassan’s have remained stable. However, with less than three weeks before Election Day, only half of New Hampshire likely voters have definitely decided whom they will vote for.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Nine hundred and seven (907) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between October 11 and October 17, 2016. The margin of sampling error for the survey is +/- 3.3 percent. Included were seven hundred and seventy (770) likely 2016 general election voters (MSE = +/- 3.5%).

2016 US Senate Election

This year’s Senate race between incumbent Senator Kelly Ayotte and Governor Maggie Hassan could determine control of the U.S. Senate and will likely be the most expensive election in New Hampshire history. However, half of likely voters have not definitely decided whom they will vote for – currently 50% of likely voters say they have definitely decided, 15% are leaning toward a candidate, and 35% are still trying to decide.

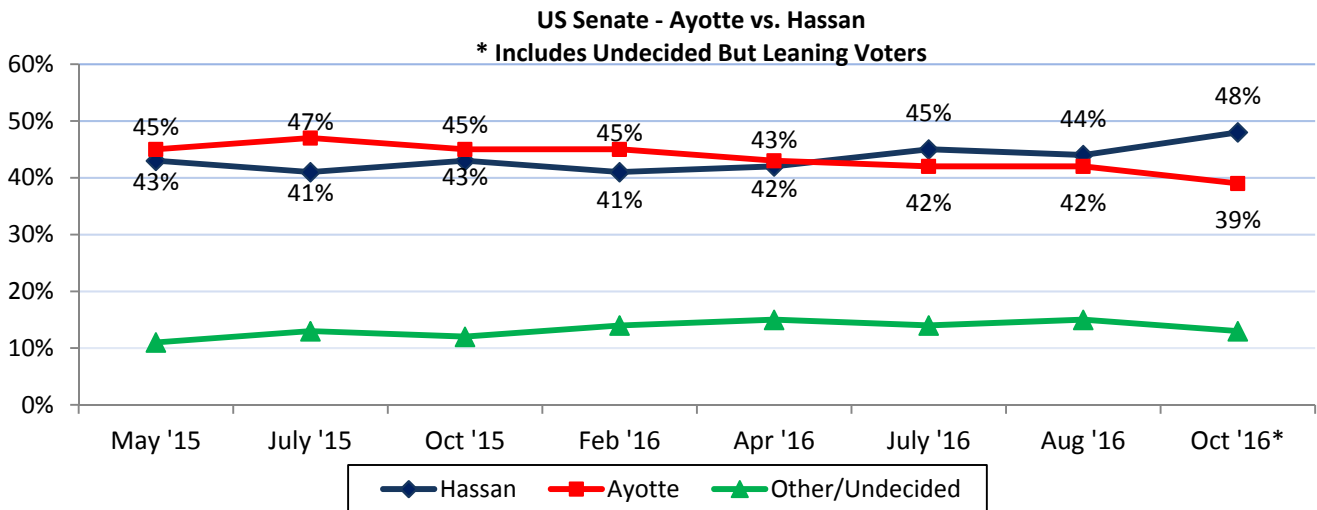

* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

2016 US Senate Election – Ayotte vs. Hassan

If the 2016 Senate election was held today, 46% of likely general election voters say they would vote for Hassan, 38% would vote for Ayotte, 3% would vote for someone else, and 13% are undecided.

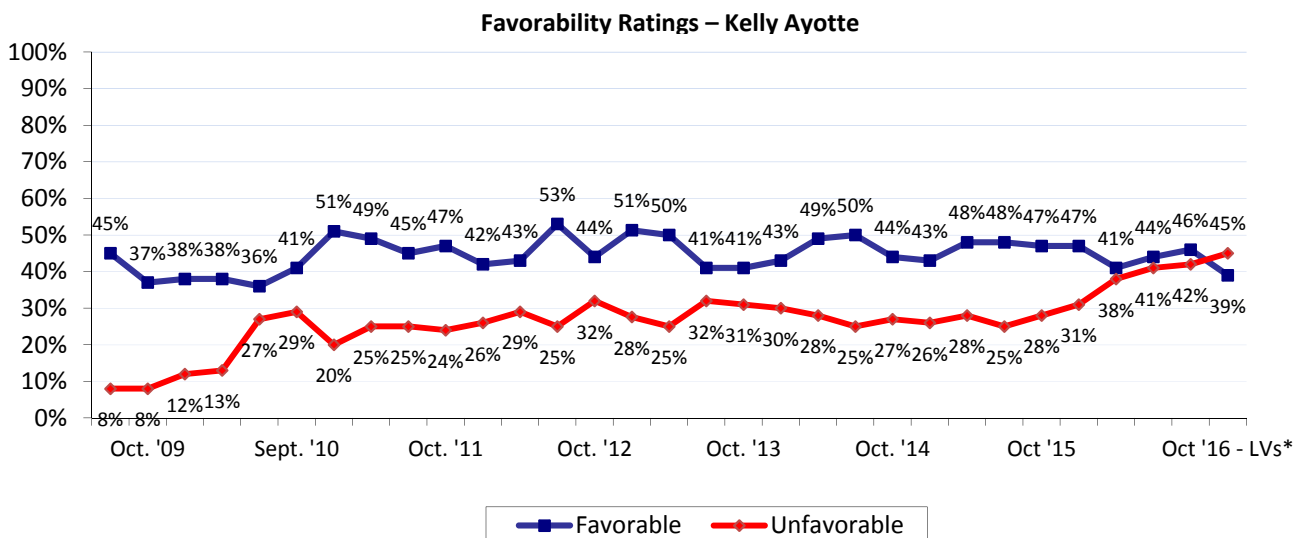

After including undecided voters who have indicated the candidate to whom they are leaning toward, the percentages become 48% for Hassan, 39% for Ayotte, 4% for someone else, and 9% remain undecided.

This marks the first time a candidate has held a statistically significant lead since the UNH Survey Center began polling on this contest in May, 2015. Ayotte and Hassan hold wide leads among members of their parties; Ayotte leads among Republicans 81%-5% and Hassan leads among Democrats 84%-8%, while Independents are divided (36%-34% Hassan). Ayotte recently said she would not vote for Donald Trump but this has not hurt her support among Trump voters. Trump voters currently favor Ayotte 82%-5% while Clinton voters favor Hassan 84%-10%.

Favorability Ratings – Senator Kelly Ayotte

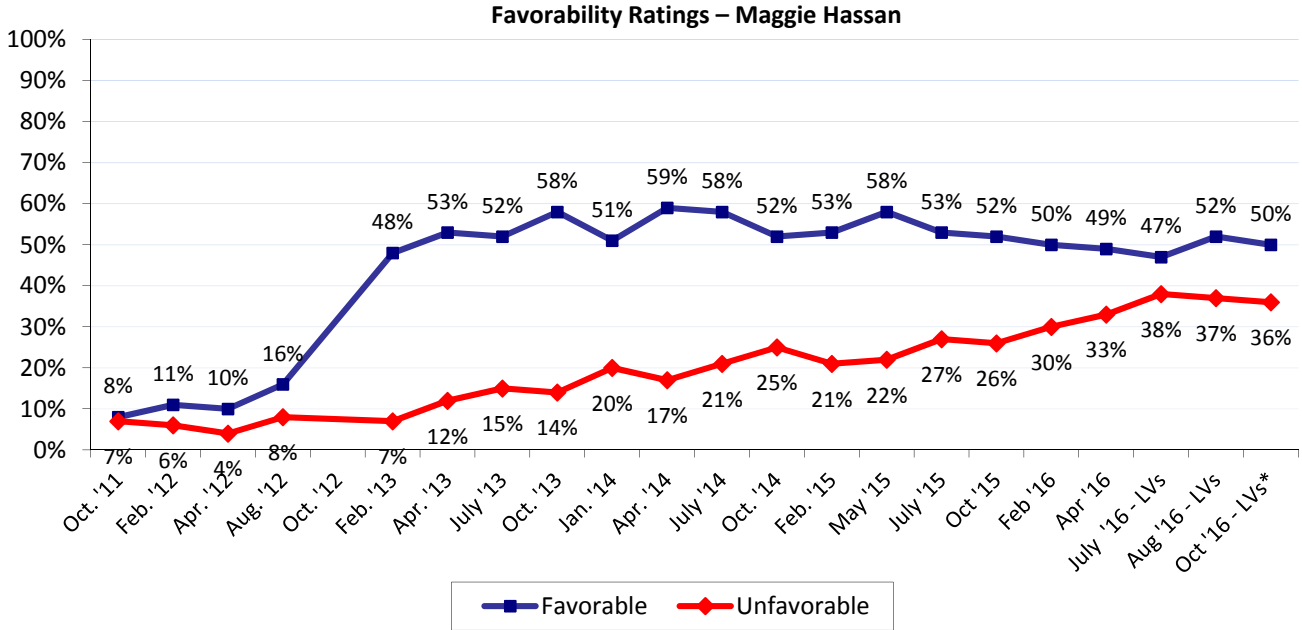

Senator Ayotte has become increasingly unpopular in recent months -- currently, only 39% of likely voters have a favorable opinion of Ayotte, 45% have an unfavorable opinion of her, 7% are neutral, and 9% don't know enough about her to say. Ayotte's net favorability rating is -6%, down from +4% in August, and marks the first time her favorability ratings have been underwater. She is still very popular among Republicans (net favorability rating of +52%), and very unpopular among Democrats (-53%) while Independents (-4%) are divided.

*All favorability ratings shown since July 2016 are among likely voters

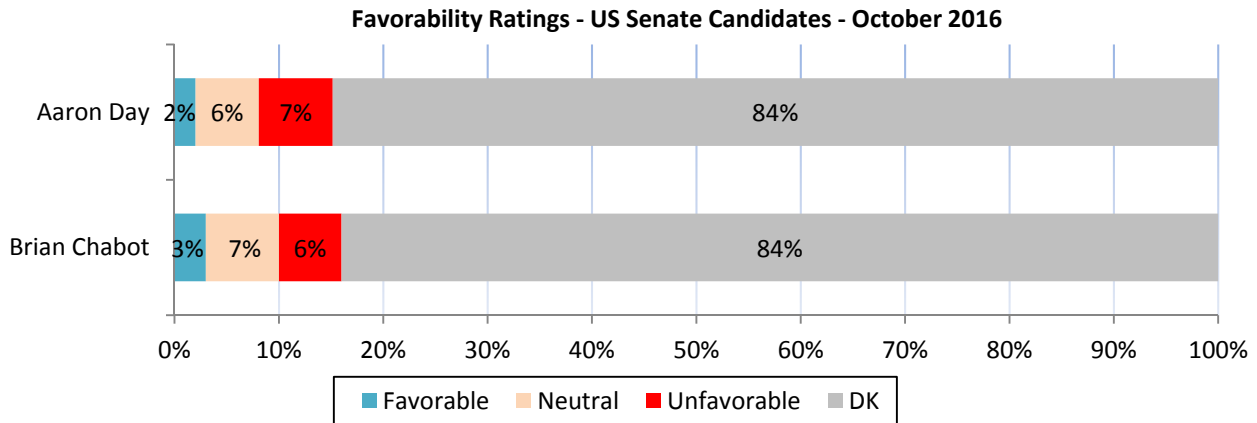

Favorability Ratings – Governor Maggie Hassan

Governor Hassan has remained somewhat more popular than Ayotte during the election cycle -- 50% of New Hampshire likely voters say they have a favorable opinion of Hassan, 36% have an unfavorable opinion, 5% are neutral, and 10% say they don't know enough about her to say. Hassan's net favorability rating is +14%, down slightly from +15% in August. Hassan is very popular among Democrats (+67% net favorable), and very unpopular among Republicans (-48%) while Independents are divided (+3%).

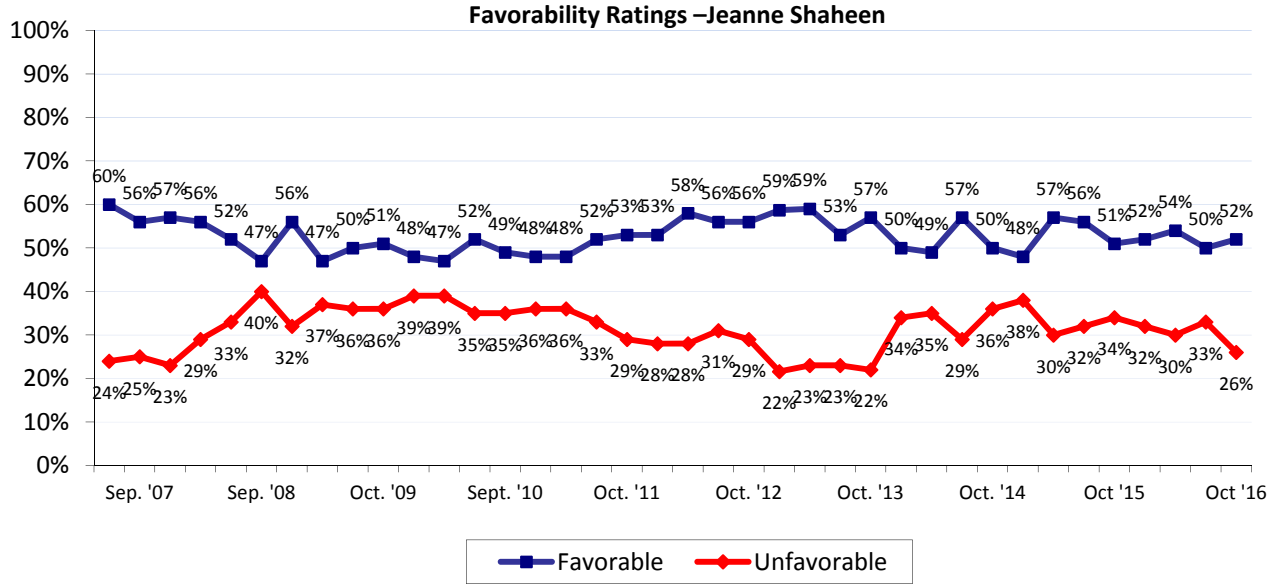

The two other candidates on the ballot for US Senate are largely unknown to New Hampshire voters. Currently 2% have a favorable opinion of Independent candidate Aaron Day, 7% have an unfavorable opinion, 6% are neutral, and 84% don't know enough about him to say. Day's net favorability is -5%.

Only 3% have a favorable opinion of Libertarian candidate Brian Chabot, 6% have an unfavorable opinion, 7% are neutral, and 84% don't know enough about him to say. Chabot's net favorability rating is -3%.

Favorability Ratings – Senator Jeanne Shaheen

Senior Senator Jeanne Shaheen remains popular in the Granite State. Currently, 52% of New Hampshire adults say they have a favorable opinion of Shaheen, 26% have an unfavorable opinion of her, 8% are neutral, and 14% don't know enough about her to say. Shaheen's net favorability rating is +26%, up from +17% in April. Shaheen is very popular among Democrats (net +70%), somewhat popular among Independents (+14%) and unpopular among Republicans (-25%).

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center and funded by WMUR-TV, Manchester, NH. Nine hundred and seven (907) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 11 and October 17, 2016. If a household included more than one adult, the adult who had the most recent birthday was selected to be interviewed.

The margin of sampling error is +/- 3.3 percent for the entire sample. Included were seven hundred seventy (770) likely 2016 general election voters (MSE +/- 3.5%). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the WMUR Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the WMUR Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
