DURHAM, NH – A majority of New Hampshire residents approve of the job Chris Sununu is doing as governor. Nearly three in four Granite Staters feel the state is headed in the right direction, the highest percentage in a decade. A majority of New Hampshire residents continue to see drug abuse as the most important problem facing the state.

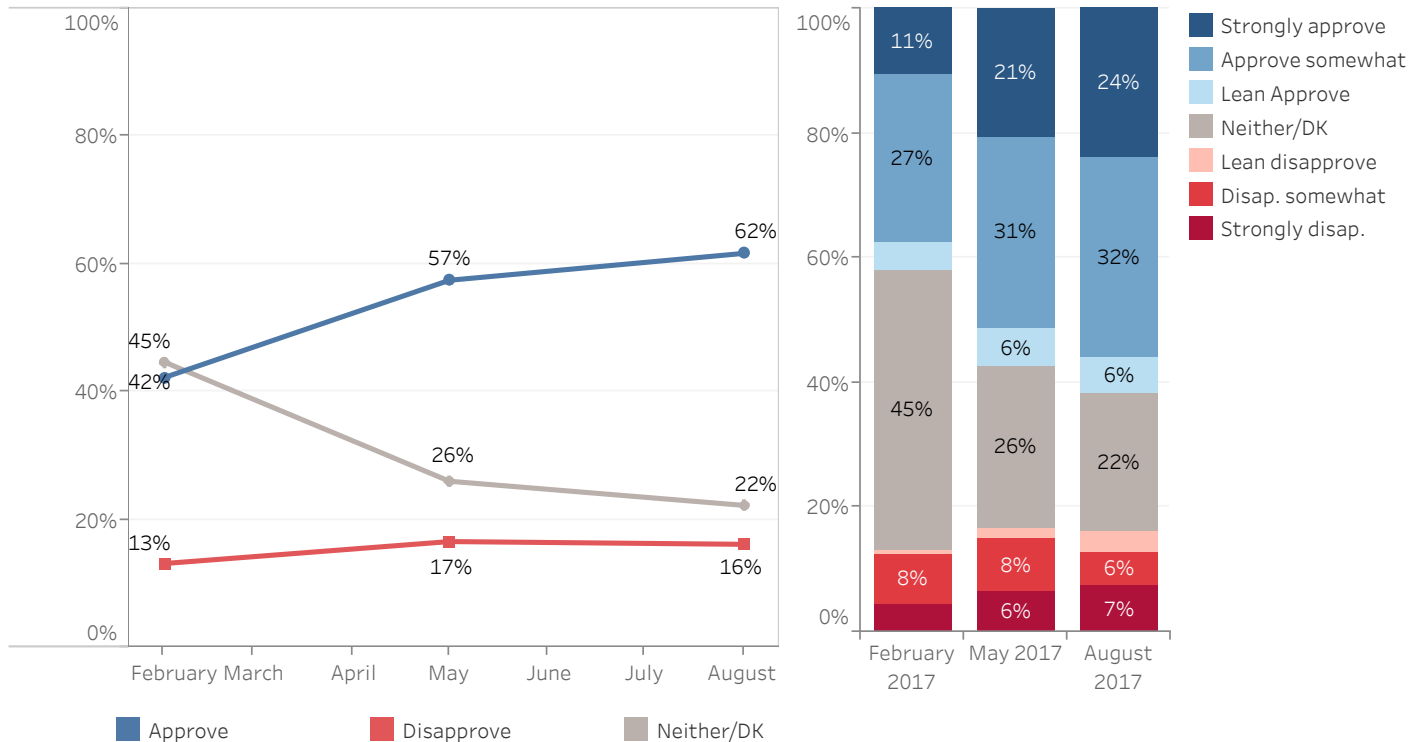

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. Five hundred and two (502) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between July 29 and August 8, 2017. The margin of sampling error for the survey is +/- 4.4 percent.

### Gubernatorial Approval

Just seven months into his first term, a majority of Granite Staters approve of Governor Chris Sununu's job performance. Currently 62% approve of the job Sununu is doing, 16% disapprove, and 22% are neutral or unsure.

The percentage of respondents who approve of Sununu has increased each quarter, while the percentage who disapprove has remained relatively steady.

Gubernatorial Approval - Chris Sununu

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

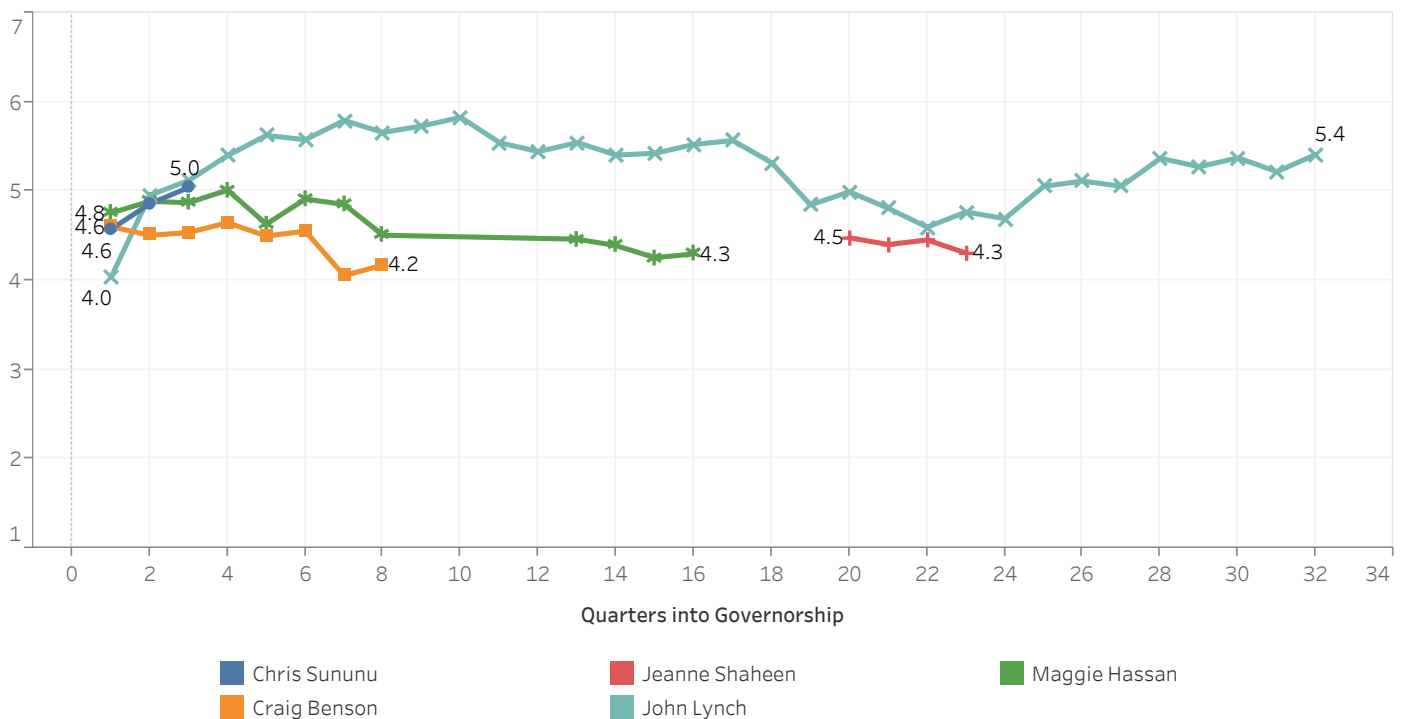

Sununu enjoys bipartisan job approval - three in four Republicans (76%) approve of the job Sununu's doing, while three in five (60%) Independents and half (50%) of Democrats approve.

**Job Approval - Governor Chris Sununu - By Party Identification**

On a scale where "strongly approve" equals 7 and "strongly disapprove" equals 1, Sununu's approval score (5.0) in his third quarter has increased from February (4.6) and April (4.9) and is now similar to where John Lynch (5.1) and Maggie Hassan (4.9) were at this point in their governorships.

**Gubernatorial Approval Score by Quarters Into Governorship -  
Jeanne Shaheen, Craig Benson, John Lynch, Maggie Hassan, Chris Sununu**  
(7=Strongly Approve, 1= Strongly Disapprove)

### Right Direction or Wrong Track

A large majority of New Hampshire residents believe the state of New Hampshire is headed in the right direction. Currently, 75% of New Hampshire adults feel the state is heading in the right direction, only 15% think the state is seriously off on the wrong track, and 10% don't know or are unsure.

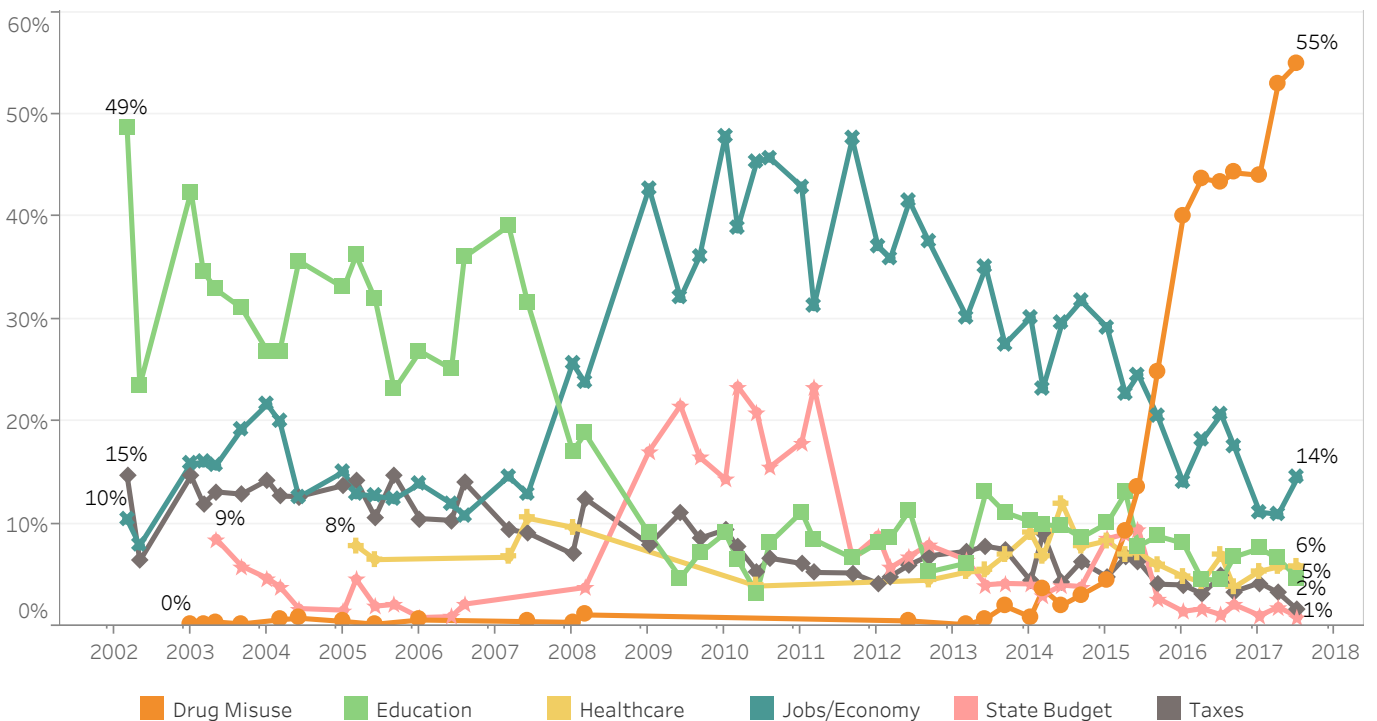

The percentage of Granite Staters who think the state is on the right track (75%) is the highest its been since July 2007. This feeling is bipartisan as majorities of Republicans (86%), Independents (72%), and Democrats (69%) say the state is headed in the right direction.

#### NH Heading in Right Direction or On Wrong Track?

### Most Important Problem Facing New Hampshire

Granite Staters remain very concerned with the drug crisis facing the state. More than half (55%) of New Hampshire adults cite drug misuse as the most important problem facing the state. Fourteen percent cite jobs or the economy, 6% cite health care and 5% cite education.

### Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Interviews were conducted by the UNH Survey Center with assistance from the University of North Florida Public Opinion Research Laboratory. Five hundred and two (502) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between July 29 and August 8, 2017. The margin of sampling error for the survey is +/- 4.4 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.4%.

The random sample used in the Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, thereby reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
